

Dear Parents and Carers,

21<sup>st</sup> May 2021

### **Advice to parents regarding the Covid Outbreak at School**

Over the last week we have shared information with you regarding several pupils and staff members in our school who have tested positive for COVID 19.

We are continuing to monitor the situation and are working closely with Public Health England. This letter is to inform you of the current situation and provide advice on how to support your child. Please be reassured that for most people, coronavirus (COVID-19) will be a mild illness.

Students and staff who have been in direct prolonged contact with the confirmed cases will have received an individual letter and will be staying at home and self-isolating for 10 days.

The school remains open and, providing your child remains well, they can continue to attend school as normal. We will keep this under review.

#### **Return Dates for our Class Bubbles**

Following consultations with Public Health England and the Department for Education our pupils in the class bubbles can return on the following dates:

<b>Class/Bus</b>	<b>Return to school on:</b>
Year 6	Tuesday 25 <sup>th</sup> May
Year 4	Tuesday 25 <sup>th</sup> May
Year 2	Tuesday 25 <sup>th</sup> May
East Portsmouth Bus (All year groups)	Tuesday 25 <sup>th</sup> May
Slapton Bus (Years 6, 4 and 2)	Tuesday 25 <sup>th</sup> May
Slapton Bus (Years R, 1 3 and 5)	Friday 28 <sup>th</sup> May

**Families with a positive case need to follow individual guidance by Public Health England and return to school on the date they have been individually advised.**

#### **What to do if your child develops symptoms of COVID 19**

If your child develops symptoms of COVID-19, you should organise for your child to be tested via the [NHS online portal](#) or by calling 119. Your household should isolate until you receive the test results giving the all clear.

#### **Symptoms of COVID 19**

The most common symptoms of coronavirus (COVID-19) are recent onset of:

- new continuous cough and/or
- high temperature
- a loss of, or change in, normal sense of taste or smell (anosmia)

**For most people, coronavirus (COVID-19) will be a mild illness.**

### **How to stop COVID-19 spreading**

There are things you can do to help reduce the risk of you and anyone you live with getting ill with COVID-19

Do:

- keep a safe distance (at least 2 metres) away from people you do not live with or who are not in your support bubble.
- Reduce the time spent in crowded areas where it may be difficult to social distance
- wash your hands with soap and water often – do this for at least 20 seconds
- use hand sanitiser gel if soap and water are not available
- clean surfaces often, paying particular attention to surfaces touched often (e.g. light switches or electronic devices)
- cover your mouth and nose with a tissue or your sleeve (not your hands) when you cough or sneeze. Dispose of tissues into a rubbish bag immediately and wash your hands.
- wear a face covering in indoor spaces where social distancing may be difficult.
- Keep indoor spaces as well ventilated as possible – let the fresh air in, even if for a short period a day.

### **Further information**
